FRIED SKINS

THE DIFFERENCE BETWEEN BAKED AND FRIED

Baked potatoes are a delicious and healthy favorite choice. They are also a low-calorie option with no oil for health-conscious customers. Naturally gluten-free and vegetarian friendly, their rustic presentation enhances their appeal.

Fried potatoes offer a golden-brown crunch with crispy skins that enhance flavor. They boost the taste of toppings like cheese and bacon, while the contrast of crisp exterior and soft filling is irresistible. A staple comfort food, they're perfect for appetizers and easily customizable for unique menu creations.
